Homework: Database

Your Homework is related to the The "Task Board" System, which you already familiar with. You can refer to the 11.Exercise-Databases.pdf document for features reference.

1. Create Task

Using the UI of the Taskboard App, create a new Task.

From Workbench, run a query to find the ID of the newly created task.
Hint: Search task by its name

Paste the query code in the box below:

```
select id from tasks where title ='new task';
```

2. Edit Task

From Workbench, run a query to update the name and the description of the task that you created.
Paste the query code in the box below:

```
update tasks

set title = 'new title', description = 'homework second task'

where id='28' and title='new task';
```

3. Select All Tasks Created by You

From Workbench find your Id and write a query that selects all tasks created by you.
Paste the query code in the box below:

```
delete from tasks where ownerid='3e299e32-1034-4c53-a00d-f84d1502f63a'
```
